Experience

Founder & Operations Manager
June 2026 - Present

WeFit Gym

- Founded and launched a fitness business, managing project planning, vendor coordination, staffing, budgeting, and operational setup.
- Implemented standardized workflows and delegated routine operations to staff and family members.
- Reduced dependence on daily personal presence by establishing more structured, system-driven operations.

Web Team Lead
May 2025 - May 2026

Koda

- Collaborated with cross-functional design teams to deliver consistent brand experiences.
- Developed scalable, AI-powered solutions for national and international clients using AI-assisted development and automation workflows.
- Improved website load speed by 40% and enhanced SEO performance across client projects.

Frontend Developer
March 2024 - December 2024

KaroStartup

- Engineered custom theme and plugin functionalities tailored to client and campaign requirements.
- Managed end-to-end website development across front-end and back-end architecture, from concept through production deployment.

Web Developer
July 2023 - September 2023

TGO

- Developed high-performing e-commerce platforms using WooCommerce and Shopify for fitness influencers and personal brands.
- Built custom themes and plugins for responsive, scalable, client-focused web solutions.

Digital Solutions Specialist
January 2023 - July 2023

Branding Venture

- Designed and developed responsive websites using WordPress, Shopify, and HTML for clients across finance, retail, and marketing.
- Optimized website performance for faster load times, scalability, and improved search engine visibility.

Software Engineer
May 2022 - December 2022

Capgemini

- Completed an apprenticeship focused on software development, problem-solving, and building scalable solutions.
- Collaborated with cross-functional teams during software development work.

Freelancer

January 2019 - February 2021

Fiverr

- Developed websites and Android applications for startups and established businesses across diverse industries.
- Delivered graphic design solutions alongside web and application development work.

Projects

AI Multi-Model Content Summarizer

An AI-powered content summarization platform for generating article summaries with multiple AI models, designed for CMS-based platforms and blogs.

- Integrated ChatGPT, Claude, and Perplexity to support multi-model content summarization.
- Included real-time processing and customizable summary formats.
- Designed for scalable, cross-platform deployment and integration with CMS-based platforms and blogs.

E-Commerce Platform with AI Recommendations

An AI-powered e-commerce platform that combines product recommendations, payments, analytics, and inventory management to support more informed online retail operations.

- Developed intelligent product recommendations.
- Integrated Stripe and Razorpay payment processing.
- Included advanced admin analytics and real-time inventory management.

Diligent Global

diligentglobal.com

Led website development and optimization for Diligent Global, an enterprise technology consulting company specializing in SAP solutions, digital transformation, and IT services. Improved website performance and page-loading speed while enhancing responsive design, user experience, and SEO. Coordinated development workflows and cross-functional teams to ensure timely delivery of client requirements, resolve technical blockers, and improve project execution. Supported the presentation of enterprise technology offerings, including SAP S/4HANA transformation, SAP implementation and migration, SAP FICO, SAP MM, cloud services, enterprise application integration, and AI-driven automation. Refined content structures, service landing pages, and lead-generation funnels to strengthen user engagement and improve conversion opportunities.

BBSampaark

bbsampaark.in

Developed a scalable registration platform for a government-backed client, enabling thousands of students to register online simultaneously. Built responsive user interfaces, integrated registration forms with backend APIs and database storage, and implemented data validation and error handling to ensure reliable submissions. Focused on performance, data accuracy, and a seamless user experience during high-traffic registration campaigns.

Technical Skills

Skills: JavaScript, PHP, SAP, Java, Jira, Google Workspace, Claude Code, ChatGPT, Trello, Prompt Engineering, HTML, CSS, WordPress, WooCommerce, Wix, Strapi, Shopify, Storyblok, Git, Photoshop, AI Tools, Premiere Pro, Microsoft Office, Grokbot
